PROFESSIONAL EXPERIENCE

ACADEMIC PROJECTS

The Clean Plate
Developer Back End 2023

Group integration project in which an App for the commercialization of food products was designed and developed, including: authentication, searches, combined filtering, sorting, user banning, e-mail sending, scoring, dashboard and payment gateway.

- https://github.com/jeanvela/The-Clean-Plate
- https://frontend-pf-seven.vercel.app/

Pokemon Go
Full Stack Web Developer 2023

Individual project in which I designed and built a pokemon SPA (Single Page Application), using the pokeapi API to develop the Web application.
It included a search engine, combined filtering, sorting, information display, home page, pagination and a form to create new pokemon, controlled with JavaScript.
